GROWN RIGHT: Forty-five years experience in the growing of quality stock is our assurance to you of the know how to grow quality plants. Our growing operations are mechanized and with our adequate equipment we can plant, cultivate, fertilize, dust, etc. when these operations should be done for maximum benefit. All roses are copper-sulphur dusted to eliminate injury from black spot and to insure proper maturing of all plants.

DUG RIGHT: We have developed special equipment for digging, bundling, transporting and all handling operations to give the plant complete protection from drying out at all times. No loss of vitality from excessive exposure is possible.

STORED RIGHT: Our new completely refrigerated and air conditioned cold storage plant has capacity of upwards of three-quarters of a million plants. It is one of the most modern plants in existence and enables us to dig our entire crop of rose bushes, shrubs, etc. at the proper time when plants are fully matured. Once in storage they are kept in perfect condition for shipment at any time and we can ship perfectly dormant plants up to May. No FREEZE DAMAGE or loss of vitality from UNSEASONABLE GROWTH is possible with plants kept in cold storage.

PACKED RIGHT: Our packing facilities are unexcelled. All plants are shipped in moisture proof containers thus insuring perfect condition on arrival. Since all stock is in storage, orders do not have to be dug. Therefore, we can offer faster shipping service.

Additional Information on other side

TERMS: Usual to those of approved credit, otherwise 25% cash with order, balance C. O. D. Packing free. Three percent discount if cash in full accompanies order. All stock guaranteed true to name and to arrive in good condition. Any failing to meet these conditions upon proper proof will be replaced. Shipping season starts October 1st and continues through May 1st.

PACKAGED ROSE BUSHES: As developers and introducers of the Seal-Kraft patented packaging process, we are in a position to supply packaged plants better than anyone else. Perhaps your facilities are such that plants so prepared are ideally suited for your retail sales. Write for descriptive literature and prices.

WANT LIST: We are in need of quantities of shrubs, vines, fruit trees and other types of nursery stock at all times. Write for want list or send us information and prices on any surplus stock you may have. Perhaps we can arrange an exchange for roses.
